### CONTICOMFORTCONTACT 5

- > Shorter braking distance and improved handling performance.
- > Optimum driving comfort coupled with safety performance.
- > Improved handling and safety.

- > Extreme low noise levels.
- > Improved fuel economy.

The ContiComfortContact™ 5 is the perfect comfort tyre designed to deliver reduced noise and improved safety. Specifically designed 'noise breakers' are built into the tread pattern to dramatically reduce the sound level of the tyre. Advanced Silica Compound Technology helps to minimise the forces of rolling resistance for better fuel efficiency leading to lower CO<sup>2</sup> emissions.

- The ContiComfortContact™ 5 actively reduces the road noise by utilising state-of-the-art technology from Continental.
- Continental Silent Tread Pattern Groove Technology Noise Breakers prevent the movement of longitudinal air – waves in order to reduce noise without compromising performance.
- The rubber compound is designed to adapt to the road condition.
- The Advanced Silica Compound Technology minimises rolling resistance for better fuel efficiency and lowered CO<sup>2</sup> emissions.
- Continental Tyre technologies produce shorter braking distances. Chamfered lateral grooves and asymmetrical rib patterns add to the shorter braking distances and handling performance.

### CONTIMAXCONTACT MC5

- > Excellent safe wet and dry performance.
- > Increased fuel economy.
- > Quiet comfortable ride.

- > Improved braking and handling performance.
- > Reduced pattern noise level.

ContiMaxContact™ MC5 sets the new standard for quiet comfort, enhanced grip and superb handling in wet and dry conditions. Noise Breaker from Conti Silent Tread Pattern Groove Technology breaks airwaves in longitudinal grooves. Reduces noise without compromising other performances.

- V-Shaped Siped inner ribs.
- Smooth rolling throughout the tyre circumferential.
- Optimum driving comfort coupled with optimum safety performance.
- Advanced Silica Compound Technology.
- Minimized rolling resistance forces achieve better fuel efficiency and also lower CO<sup>2</sup> emissions.
- Improved fuel economy.

## CONTISPORTCONTACT 5

- > **Unlimited driving fun thanks to excellent grip.**
- > **The new ContiSportContact 5 - Control never has been sportier.**

Continental has developed a tyre which is equally suitable for sporty cars & SUVs with sporty driving characteristics. With this new development, the tyre engineers have made significant progress in comparison to the popular predecessor ContiSportContact 3:

- Shorter braking distances in all weather conditions.
- Excellent road grip and safety when cornering.
- Reduced fuel consumption.

## CROSS CONTACT UHP

- > **For high speeds in road use.**
- > **Very short stopping distances especially in the wet.**
- > **Amazing good traction on grass and mud.**
- > **Average hydroplaning performance.**
- > **Noise performance.**

The bionic contour of the tyre narrows the tyre when moving and widens it when braking. This reduces the braking distance and ensures higher cornering stability. The tyre's asymmetrical profile and outer rigidity guarantees exceptional cornering and a fun drive without compromising on safety. The four or five (depending on tyre width) circumferential drainage grooves provide excellent protection against aquaplaning.

- Short braking distances and high cornering stability
- Safety reserves for outstanding handling and fun at the wheel
- Low rolling resistance and excellent grip

## VANCONTACT 100

PASSENGER / 4WD

- > High efficiency produces higher mileage.
- > Improved durability on all roads providing longer service life.
- > High safety reserves for heavy loads.

The ContiVanContact 100 is an all-round talent that can not only easily cope with poor road surfaces and heavy loads, but which also offers a high mileage. Its specially reinforced carcass and sturdy sidewall, the stone-deflecting tread design, and the strong scuff protection strip on the sidewall make the tyre a particularly robust load carrier. We have managed to reduce rolling resistance by 10% in comparison to the successful predecessor model – offering yet another advantage to transport companies who run Sprinters and similar vans and for whom speed and timeliness are the key in the distribution business. Continental has 14 sizes available with diameters ranging from 14 to 16 inches and load-bearing capacities up to a load index of 115 (1,215 kg per tyre).

- High level of efficiency thanks to higher mileage
- Improved durability on all roads and thus longer service life
- High safety reserves for heavy loads
