SP SPORT 300E

- > Silica based tread compound.
- > Jointless Band construction.
- > Original Equipment fitments.

Suited to drivers looking for a high performance drive, the 300E delivers superb cornering and steering response and is endorsed by motor sport legends and car manufacturers including Toyota.

- Superior braking, cornering and handling in wet and dry conditions. Also reduces rolling resistance, which can help enhance fuel economy.
- Jointless Band Construction (JLB) ensures the tyre retains its optimum shape when cornering for maximum steering response.
- Endorsed by leading car manufacturers as original equipment.

FAST RESPONSE

- > Touch technology
- > Cutting edge tread compound with high silica content and special molecular 'cross linking' for higher stiffness
- > Asymmetric tread design
- > Low noise generation pattern

The SP Sport Fast Response is the latest luxury passenger tyre offering from Dunlop. It has been designed for the driver who wants to be in touch with the road and enjoy a comfortable, quiet and controlled driving experience. Featuring Touch Technology any driver can be in control and enjoy precision handling in both wet and dry conditions.

- By combining 4 key technological features the result is improved handling and enhanced grip when braking and accelerating, benefits that keep you in touch with the road.
- Excellent mileage combined with low rolling resistance and optimum wet braking characteristics.
- Delivers superior control and comfort for a quiet and secure ride.
- Promotes a quieter and smoother ride.

SPORT 01

- > Silica based tread compound.
- > Jointless Band construction.
- > Asymmetric tread pattern.
- > Original Equipment.

An impressive tyre, which meets the original equipment demands of many premium vehicle manufacturers including BMW, Mini, Audi and Jaguar. The Sport 01 promotes enhanced levels of braking and handling in wet and dry conditions and delivers low level noise and comfort.

- Superior braking, cornering and handling in wet and dry conditions. Also reduces rolling resistance, which can help enhance fuel economy.
- Jointless Band Construction (JLB) ensures the tyre retains its optimum shape when cornering for maximum steering response.
- Enhances cornering while retaining straight-line stability, with effective water dispersion in the wet.
- Endorsed as original equipment by leading car manufacturers.

SPORT MAXX RT

- > Adaptive Compound.
- > Massive Outer Shoulder Block.
- > Short-Braking Blocks.
- > Optimised Construction.

The Sport Maxx RT (Racing Technology) has finally arrived on our shores, replacing its incredibly successful predecessors, the SP Sport Maxx and SP Sport Maxx TT. Combining the adaptive compound and short braking blocks, this revolutionary tyre provides the driver with better grip and braking thanks to its motorsport derived technologies. With improved features promising incredible performance and superior fuel economy, this amazing new concept has been designed with the genes of a true supercar race tyre.

GRANDTREK AT20

- > Silica compound.
- > Robust Case Construction.

Fitted as standard on Toyota Prado models for an exceptional ride. The Grandtrek AT20 features reinforced casing to reduce the risk of sidewall damage and is suitable for drivers who enjoy both on and off-road driving.

- Superior braking, cornering and handling in all conditions. Also reduces rolling resistance, which can enhance fuel economy.
- Offers extra protection against many hazards commonly encountered in off-road conditions.

GRANDTREK AT3

- > More even distribution of contact pressure, resulting in even wear and improved tyre life
- > Delivers high traction in on and off-road conditions and reduces noise for a quieter ride.
- > High quality fitments available to suit most modern 4WD vehicles sold in Australia.

Developed for Outstanding On and Off-road Performance, this 4x4 tyre gives you the Best of Both Worlds. Enjoy High-Speed Stability and Impressive Off-Road Traction in Tough Conditions along with Lower Noise Generation for a Quieter, More Comfortable ride.

SP175E

- > Silica based tread compound.
- > Sturdy rib-block design.
- > Comprehensive groove network.

- Superior braking, cornering and handling in wet and dry conditions. Also reduces rolling resistance, which can help enhance fuel economy.
- Enhanced tracking and braking.
- Fast water clearance.
