

P1 CINTURATO

PASSENGER / 4WD

- > High-performance compound material.
- > Tension control and new profile.
- > Special tread design with audio frequency adjusted pitch.
- > Latest raw material and formulation, aerodynamic optimised sidewall structure and lightweight design.

Good control in both dry and wet conditions assuring a comfortable driving experience. Reduction of rolling resistance, especially in urban situations. Tread design with specific pitch sequence: quietness inside the vehicle. Hybrid materials and innovative tread pattern design: more safety. In both wet and dry conditions. Tension control and new mould profile: more comfortable driving experience. New materials and innovative compounds, aerodynamic sidewalls and lower weight: lower fuel consumption and CO² emissions.

- Excellent safety performance under dry and wet conditions.
- More comfortable driving.
- Effective noise reduction for a quiet driving experience.
- Low fuel consumption.

CINTURATO P7

The high performance tyre for medium to high-powered cars. A perfect combination of low rolling resistance, plastic and acoustic comfort, good mileage guaranteeing the Pirelli braking and handling performances.

- Wide continuous ribs for pattern stiffness and steering precision.
- Asymmetric pattern design with optimised contact patch.
- Four wide longitudinal grooves which aid in rapid water expulsion.

P ZERO

PASSENGER / 4WD

A milestone in the development of the Pirelli range, P ZERO™ has been chosen as original equipment for the most performance oriented and powerful models on the market. A reference point for the ultra high performance segment, it is characterised by an asymmetric tread pattern. Ideal for all top of the range sports and high-powered cars, it can also be considered for powerful mid-range vehicles.

- Three solid longitudinal ribs increase pattern stiffness with optimised and constant contact area.
- Outer shoulder with large rigid blocks for higher lateral rigidity and steering response.
- Three wide longitudinal grooves help fast water expulsion.
- High technology asymmetric contour for an optimised footprint at speed.

SCORPION VERDE

- > Lower internal noise.
- > All season performance.
- > Safety in wet conditions.
- > Reduced fuel consumption and CO² emissions.

Pirelli's Scorpion Verde All-Season Plus tyre combines attractive styling and advanced tread compounds for better year round grip. This tyre features the latest Pirelli technologies and delivers exceptional high performance handling and grip from summer to winter. In addition, this all-season tyre promotes increased fuel efficiency thanks to its low rolling resistance.

- Optimized pitch sequence and phasing.
- Longitudinal siping and high lateral siping density.
- Large contact patch and four wide longitudinal grooves.
- Optimized profile and innovative materials.

SCORPION ATR

Scorpion ATR is the technological footprint on the ground for extremely versatile and powerful vehicles. Thanks to its reinforced structure and very unique tread design Scorpion ATR makes light work of driving these vehicles on rough terrain. Excellent traction grip on every surface, reduced aquaplaning, top braking efficiency, and the highest resistance to damage, while providing easy comfortable driving on normal roads.

- Robust carcass and reinforced sidewall area.
- Wide, rugged shoulder blocks.
- Curved central grooves.
- High resistance to damage.
- Improved traction and braking efficiency.
- Continuous traction in off road situations.

PASSENGER / 4WD
